GUARDIANS, PREPARE FOR LIGHTFALL!

The date was August 23, 2022. Guardians all around the world waited patiently for Bungie to air their Showcase, anticipating and questioning what they had in store for us all. We expected a new DLC, some game changes, and possibly a new exotic for us to grind out for weeks until we got the perfect roll of stats we all wanted. What we received, however, was more than what any of us could have hoped to imagine. Today we are going to delve into the world of *Destiny 2* and explore just what Bungie has delivered to us, and believe me there is a lot of exciting news for us to cover.

We have to start with the big guns on *Destiny 2 Lightfall*, the next and concluding expansion in the *Light & Darkness* Saga of the *Destiny 2* storyline. Our favorite purple and gold-loving Cabal emperor is returning with a vengeance. After becoming a disciple of *The Witness*, Calus and his *Shadow Legion* have overtaken Neptune's capital city, which has managed to survive the collapse of the golden age and continued to thrive, becoming a beautiful labyrinth of towers and neon lights. We as guardians will take the fight to Calus and his minions, discover the hidden threads that tie us together and learn to weave them anew. The stage is set in *Neomuna*, a neon metropolis covered in high-rising skyscrapers, and neon-drenched streets. This beauty is, of course, marred by the shadow of death and war that is to come.

With this new adventure and campaign to immerse yourselves into, along comes a new subclass, namely *The Strand*. The darkness has more than just stasis to offer us, we just weren't pulling on the right strands. Harnessing the power of *The Strand* by learning to tap into the invisible threads of reality that bind us together, weaving powerful attacks, and taking control of power in ways we have never seen before in *Destiny 2*. You may even learn to use this ability to scale your way around the city in ways never thought possible until now. These new abilities are certainly going to make treasure hunting a lot more fun!

Introduced in the *Witch Queen* DLC, Legendary mode is making a return for those players who want more of a challenge and enjoy the punishment of dying more times than they would like to admit. It's worth all the pain though for those better rewards, setting you up for higher light activities. There are new legions of Cabal to face along with *Tormentors*, a new boss-like enemy introduced to make your life just a little bit harder. Quite fitting really as it's probably going to throw us around like rag dolls.

The *Destiny 2: Lightfall* pre-orders are available to pick up now with three options to choose from. These are the *Destiny 2: Lightfall* Standard Edition, *Destiny 2: Lightfall* Standard Edition & Annual Pass, and the *Destiny 2: Lightfall* Collectors Edition. You'll be able to choose a package perfectly tailored to you and your needs.

Next up in our little rundown of *Destiny 2* awesomeness, we have the new season that was announced for our loot-hungry guardians, or the *Season of Plunder* if you want to get technical about it. What is better than flying a spaceship to kill unknown invaders? Flying a space pirate ship to kill unknown pirate invaders, obviously! This is excellent because that is exactly what Bungie has delivered fresh with this season. *Eramis, the Kell of Darkness*, has escaped from her icy prison and is out for ravenous revenge. She plans to collect a crew of outlaws and bandits to scour the galaxy for dark relics and finish what she started. Our guardians, in order to foil her plot, must recruit crews of their own in brand new activities full of high adventure and claim the treasure just waiting for their overflowing vaults. Harness the power of the reworked Arc 3.0 Subclass to give you a new and exciting edge against your foes. Time to get those treasure maps ready, while swashbuckling your way into pirate lord's hideouts. Who knows, you might find a relic or two you might want to keep.

Learning outcomes (What I have learnt):

- 1. We can use Wordpress without buying hosting by just using xampp on our localhost.**
- 2. In wordpress we can design webpages without coding. Elementor is the plugin used for designing and customising web pages.**
- 3. In wordpress posts and pages can be selected from side bar to see, add and edit posts and pages for our website.**
- 4. To create a post we have to go in posts section in Wordpress side bar. Now we can add a new post and edit it with elementor.**

1. Aim/Overview of the practical: Create a Wordpress website and Write the steps to create it.

2. Steps: -

Step 1: Define your site.

Finalize the category in which your website is about.

Step 2: Choose a domain name.

Step 3: Get web hosting.

We will use the xampp server to run the wordpress in localhost.

Step 4: Install WordPress.

Download and install the wordpress. Inside htdocs folder of xampp we have to place the wordpress folder.

Step 6: Install WordPress plugins.

Installing Elementor plugin makes a website creation and editing more easy and efficient.

Step 7: Complete your administrative pages.

Create and edit the different pages on the website. Ex- home, about, blogs, products, contact us.

Step 8: Publish your WordPress site.

Publish the changes on the real website.

Sony recently gave its PlayStation Plus subscription a massive overhaul, merging it with PlayStation Now and splitting it into multiple tiers spread across price points. Both are now virtually two sides of the same coin, with similar prices and catalogues of games so large you'd take years to explore it all. That doesn't mean they're impossible to tell apart, though, with several differences that can turn out to be the ultimate reason for you to pick one over the other. So today we stack the two services against each other to help you decide where you should put your money.

Description

Vistaprint India customizes all its products in facilities located within India. Some of our raw materials, intermediate components, and consumables used in the manufacturing of the final product could be from one or more countries. As we follow Global Sourcing, one product is likely to have a different country of origin depending on the batch sold.

Learning outcomes (What I have learnt):

- 1. WordPress is very easy to use and has an intuitive interface. Adding new pages, blog posts, images, etc. on a regular basis is a breeze and can be done quickly. Because the technology is so simple, time spent on formatting is greatly reduced.**
- 2. WordPress is a self-contained system and does not require HTML editing software (such as Adobe Contribute or Dreamweaver). You can create a new page or blog post, format text, upload images (and edit them), upload documents, video files, image galleries, etc. all without the need for additional HTML or FTP software.**
- 3. The code behind WordPress is very clean and simple, making it easy for search engines to read and index a site's content. In addition, each page, post, and image can have its own meta tag keywords, description, and title, and be optimized for specific keywords, allowing for very precise search engine optimization. You can also use tags to further enhance your search engine optimization efforts.**
